Course Information Sheet

Biochemistry (BST1123)

Document No. CRS-0071 · Academic Year 2020/2021 · Semester 1

Course Details

Field	Details
Course ID	14
Course Name	Biochemistry
Course Code	BST1123
Credit Value	2.00
Department	Bio Systems Technology (Department ID: 3)

Course Description

This course introduces the chemistry of life with emphasis on biomolecular structure and metabolism. Students study the structure and function of carbohydrates, lipids, proteins, and nucleic acids, followed by enzyme kinetics and regulation, bioenergetics, and the central metabolic pathways. Laboratory sessions illustrate key biochemical techniques and measurements used in the life sciences. The course links molecular events to the behaviour of cells and whole organisms in biological systems contexts.

Learning Outcomes

On successful completion of this course, students will be able to:

- Describe the structure and function of the major classes of biological molecules.
- Explain enzyme kinetics and the regulation of enzymatic activity.
- Trace the central metabolic pathways and their energy relationships.
- Perform basic biochemical laboratory techniques and interpret the results.

Assessment and Grading

Component	Weighting	Description
Assignments and Quizzes	20%	Graded coursework issued and completed during the semester
Mid-Semester Test	10%	Written test covering the first half of the course content
Final Examination	70%	End-of-semester written examination

Note: this is a sample document generated for project testing purposes. Assessment weights and descriptive text are illustrative.
