Course Information Sheet

Mobile Application Development (ICT3113)

Document No. CRS-0054 · Academic Year 2023/2024 · Semester 2

Course Details

Field	Details
Course ID	16
Course Name	Mobile Application Development
Course Code	ICT3113
Credit Value	3.00
Department	Information and Communication Technology (Department ID: 1)

Course Description

This course covers the design and implementation of applications for mobile devices. Students study the architecture of a modern mobile platform, its application lifecycle, and the user interface components and design patterns suited to small screens and touch interaction. Data storage on the device, connectivity to remote services, and sensor access are treated in practical exercises that culminate in a small but complete application. Performance, testing, and deployment considerations for releasing applications are also introduced.

Learning Outcomes

On successful completion of this course, students will be able to:

- Explain the architecture of a mobile platform and the lifecycle of a mobile application.
- Design and build user interfaces appropriate to touch-based mobile devices.
- Implement local data storage and remote service connectivity in an application.
- Test and prepare a small application for deployment to end users.

Assessment and Grading

Component	Weighting	Description
Assignments and Quizzes	20%	Graded coursework issued and completed during the semester
Mid-Semester Test	10%	Written test covering the first half of the course content
Final Examination	70%	End-of-semester written examination

Note: this is a sample document generated for project testing purposes. Assessment weights and descriptive text are illustrative.
