Course Information Sheet

Web Technologies (ICT1213)

Document No. CRS-0045 · Academic Year 2024/2025 · Semester 1

Course Details

Field	Details
Course ID	7
Course Name	Web Technologies
Course Code	ICT1213
Credit Value	2.00
Department	Information and Communication Technology (Department ID: 1)

Course Description

This course introduces the technologies used to build and operate modern websites and web applications. Students learn Hypertext Markup Language (HTML), Cascading Style Sheets (CSS), and JavaScript, and they apply the client-server model to publish interactive pages. Topics include responsive page layout, client-side scripting, form handling, and web standards, including accessibility and basic security practices. Practical sessions guide students through building a small but complete website from first principles.

Learning Outcomes

On successful completion of this course, students will be able to:

- Build structured web pages using HTML and style them with CSS.
- Add interactivity to web pages using client-side JavaScript.
- Explain the client-server model and the HTTP request-response cycle.
- Apply web standards, including accessibility and basic security practices, in a small project.

Assessment and Grading

Component	Weighting	Description
Assignments and Quizzes	20%	Graded coursework issued and completed during the semester
Mid-Semester Test	10%	Written test covering the first half of the course content
Final Examination	70%	End-of-semester written examination

Note: this is a sample document generated for project testing purposes. Assessment weights and descriptive text are illustrative.
