Course Information Sheet

Introduction to Plant Science (BST1113)

Document No. CRS-0051 · Academic Year 2020/2021 · Semester 1

Course Details

Field	Details
Course ID	13
Course Name	Introduction to Plant Science
Course Code	BST1113
Credit Value	3.00
Department	Bio Systems Technology (Department ID: 3)

Course Description

This course provides a foundation in the structure, function, and diversity of plants. Students study plant cells and tissues, vegetative and reproductive structures, photosynthesis, respiration, growth, and development, together with an overview of the plant kingdom and plant classification. The relevance of plants to agriculture, food production, and the environment is a recurring theme. Practical classes include microscopy, plant anatomy observation, and the identification of major plant groups.

Learning Outcomes

On successful completion of this course, students will be able to:

- Describe the structure and function of plant cells, tissues, and organs.
- Explain photosynthesis, respiration, and the main stages of plant growth and development.
- Identify the major groups of the plant kingdom using classification keys.
- Discuss the role of plants in agriculture, food production, and the environment.

Assessment and Grading

Component	Weighting	Description
Assignments and Quizzes	20%	Graded coursework issued and completed during the semester
Mid-Semester Test	10%	Written test covering the first half of the course content
Final Examination	70%	End-of-semester written examination

Note: this is a sample document generated for project testing purposes. Assessment weights and descriptive text are illustrative.
