Course Information Sheet

Information Security (ICT3123)

Document No. CRS-0055 · Academic Year 2024/2025 · Semester 1

Course Details

Field	Details
Course ID	17
Course Name	Information Security
Course Code	ICT3123
Credit Value	2.00
Department	Information and Communication Technology (Department ID: 1)

Course Description

This course introduces the principles and practice of securing information systems. Students study the confidentiality, integrity, and availability triad, authentication and access control, cryptographic techniques and their correct application, and the classification of common threats, vulnerabilities, and attacks. Organizational aspects, including risk assessment, security policies, and incident response, complement the technical material. Laboratory exercises demonstrate both attacks and defences in a controlled environment.

Learning Outcomes

On successful completion of this course, students will be able to:

- Explain the confidentiality, integrity, and availability triad and its use in security analysis.
- Apply cryptographic techniques appropriately to protect information.
- Identify common threats and vulnerabilities and evaluate countermeasures.
- Outline the elements of security management, including policy, risk assessment, and incident response.

Assessment and Grading

Component	Weighting	Description
Assignments and Quizzes	20%	Graded coursework issued and completed during the semester
Mid-Semester Test	10%	Written test covering the first half of the course content
Final Examination	70%	End-of-semester written examination

Note: this is a sample document generated for project testing purposes. Assessment weights and descriptive text are illustrative.
